LKCM SMALL CAP CORE COMPOSITE
Fourth Quarter, 2011 Update

<u>Performance</u> **	<u>4th</u> <u>QTR</u> <u>2011</u>	<u>YTD</u> <u>2011</u>	<u>3 Year</u> <u>Annualized</u>	<u>5 Year</u> <u>Annualized</u>	<u>Since</u> <u>Inception</u> <u>Annualized*</u>
LKCM Small Cap Core Composite	13.50%	5.09%	23.48%	3.10%	11.63%
Russell 2000 Index	15.47%	(4.18%)	15.63%	0.15%	7.79%

* 10/01/94 – 12/31/11

Small companies, as measured by the Russell 2000, gained 15.5% during 4Q11 but still finished the year down 4.2%. It was a challenging and volatile year for the market that saw a strikingly different phase and performance in each quarter. 1Q11 saw solid market gains as a continuation of the global growth coming out of 2010. 2Q11's consolidation wasn't a surprise, but 3Q11's bear-market correction caught most investors off guard as macro issues, namely the European sovereign debt crisis and our own debt ceiling stalemate, sent the markets reeling lower. October witnessed a sharp rebound which resulted in a positive, double-digit return in 4Q11 as the U.S. economy proved resilient to the global challenges. We believe the U.S. economy remains positioned for further growth.

The increased uncertainty and volatility of 2011 caused many investors to exit the markets thus putting additional downward pressure on stocks. We believe this cautious sentiment on the markets, despite the recent rebound, should position us for positive returns in 2012 as continued economic growth, low interest rates and excess capital should support higher stock prices.

The LKCM Small Cap Core Composite underperformed by 197 bps in 4Q11 and finished 927 bps ahead of the benchmark in 2011. In 4Q11, we captured most of the rebound relative to the market. Our stock selection detracted from our results as our higher quality strategy did not keep up with the lower-quality, higher beta bounce in October. Our Energy stocks were a positive contributor but were more than offset by weakness in other sectors, especially the Technology, Financials and Consumer Discretionary sectors. Sector allocation decisions were a positive in 4Q11.

Overall, we are pleased with the absolute and relative returns generated in 2011. The majority of the outperformance came from our stock selection while our sector allocation decisions were a slight drag on our results. We remained optimistic about the underlying economic trends during the year and were underweight the defensive sectors, Utilities and Consumer Staples, which proved to be the two best performing sectors in 2011. Stock selection was additive in most sectors, especially in the Consumer Discretionary, Energy, Financials and Materials sectors, as our focus on high quality, best positioned companies was rewarded. Given our investment approach, it's not uncommon for our strategy to excel in challenging, volatile markets. We also benefited from five of our portfolio companies being acquired in 2011 and we expect merger and acquisition activity to continue in 2012.

Our investment strategy is to identify competitively advantaged companies that generate strong financial returns with good reinvestment opportunities and purchase these stocks at attractive prices. We believe this strategy of investing in competitively advantaged companies with viable strategies to increase the value of their businesses will continue to be beneficial for our investors. Our goal is to generate superior returns over time relative to our benchmark and to minimize the risk (volatility) of the portfolio.

The management of our Small Cap Core Composite truly maximizes our internal, research-intensive investment process. By incorporating the total research capabilities of the firm, we are constantly identifying and analyzing companies that meet our stringent criteria. We believe our consistent investment disciplines have produced a winning investment strategy, and have us well positioned going forward.

NA -- Information is not statistically meaningful due to an insufficient number of portfolios in the composite for the entire year.

Luther King Capital Management (LKCM) is a registered investment adviser under the Investment Advisors Act of 1940 and is defined as an independent investment management firm. LKCM claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. LKCM has been independently verified for the periods January 1, 1992 through June 30, 2010. Verification assesses whether (1) the firm has complied with all the composite construction requirements of the GIPS standards on a firm-wide basis and (2) the firm's policies and procedures are designed to calculate and present performance in compliance with the GIPS standards. The Small Cap Core Composite has been examined for the periods October 1, 1994 to June 30, 2010. The verification and performance examination reports are available upon request. The firm-wide verification and composite performance examination for the period July 1, 2010 through December 31, 2010 is currently being conducted.

The Small Cap Core Composite contains all fully discretionary taxable and non-taxable, fee-paying small cap accounts under management. Our small-cap strategy seeks to generate investment returns that exceed the applicable benchmark while attempting to manage portfolio risk and volatility. Our small-cap strategy seeks to achieve its investment objective through fundamental analysis of individual companies and seeks high quality companies based on various criteria, such as profitability levels, balance sheet quality, competitive advantages, market share positions, ability to generate excess cash flows, meaningful management ownership stakes, and relative valuation. The strategy typically purchases securities of companies with market capitalizations between \$400 million and \$2.5 billion at the initial time of purchase. For comparison purposes, the composite is measured against the Russell 2000 Index, which is a market capitalization weighted index that is the most representative of the market capitalization of the securities in this composite.

January 1, 2003 is the effective creation date of the Small Cap Core Composite. Quarterly performance from October 1, 1994 to December 31, 2011 is available upon request. The annual standard deviation presented is an asset-weighted calculation of performance dispersion for accounts in the composite the entire year. The 3-year annualized standard deviation ending December 31, 2011 for the composite is 22.12% (gross) and 24.99% for the Russell 2000 Index. Ten years annualized compound return ending 12/31/11: Small Cap Core Composite 9.02% (gross), 8.21% (net); Russell 2000 Index 5.62%. The current management fee schedule for this composite is as follows: 1% on the first \$5,000,000; .75 of 1% on the next \$5,000,000; .50 of 1% above \$10,000,000; minimum annual fee \$30,000. Clients prior to June 30, 2004, may have a different fee schedule. LKCM Small Cap Equity Fund fees are calculated and paid quarterly in arrears, at annualized rates up to 0.75% of the Fund's average daily net assets. In some instances, LKCM voluntarily waives these fees and/or reimburses the LKCM Small Cap Equity Fund in order to maintain a designated expense ratio. For a complete list of our management fees, please see our Form ADV, Part 2A.

Policies for valuing portfolios, calculating performance, and preparing compliant presentations are available upon request. Effective January 1, 2005, new accounts are added quarterly when the account is at least 75% invested and fully representative of investment style. Prior to January 1, 2005, accounts were added soon after inception on a quarterly basis and/or when considered fully representative of investment style. A complete list and description of the firm's composites is available upon request. Terminated accounts are included through the last full calendar quarter under management. Results are presented before taxes, both gross of management fees and net of actual management fees, net of commissions and other transaction costs, and include the reinvestment of all income. The U.S. dollar is the currency used to express performance. Past performance is not indicative of future results.
